

Using ExploreLearning Science4Us for Family Engagement

[Science4Us](#) is an interactive standards-based science solution that provides foundational skills for K-2 grade students. Science4Us offers multiple opportunities and resources for parents to get involved.

- 1. Parent Letters** - All schools using Science4Us have access to our Science4Us [parent letters](#), available in English or [Spanish](#). These handouts introduce Science4Us to families, provide login credentials, and encourage parents to explore the lessons with their child.
- 2. Parent Guides** - Science4Us also comes equipped with a [parent guide](#) to help parents navigate Science4Us and drive student student learning outside of the classroom. Topics covered include:
 - Login instructions
 - Student navigation instructions
 - The 5E Inquiry Based Instructional Model
 - How to engage their students in their education
- 3. Understanding Checks** - Parents can monitor their child's progress within Science4Us and check their understanding by having conversations. Learning is best done collaboratively. Science4Us encourages parents to work with their child to help them develop understanding. If any knowledge gaps occur, families and schools can work together to address them. Parents can:
 - Ask their children about the questions that come up at the end of sections
 - Start discussions with them about the content they are learning
- 4. The ExploreLearning Store** - To reward and encourage effort and understanding, parents can purchase Science4Us merchandise for their children in our online [store](#).

Try Science4Us free for 30-days.
