

Frax

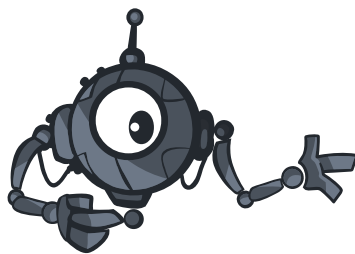

# Pilot Program

## What is Frax?

ExploreLearning Frax uses the latest research-based instructional methods to create a more effective, more fun way for grade 3+ students to learn fractions. Fun games, rewards, and personalized learning help students build their skills and understanding—as they explore the galaxy with fractions!

- ▲ Adaptive and individualized program that builds conceptual understanding of fractions
- ▲ Fractions taught through multiple game-based models
- ▲ Research-based instructional methods and innovative technology
