

Build a Strong Foundation in Math

Math fact fluency and fractions are two of the biggest challenges in elementary math and they are also the strongest predictors of future mathematics success. **ExploreLearning Reflex** and **Frax** give students the skills (and confidence) in these foundational topics, so they can take on what comes next! And with **Gizmos** interactive math and simulations, students can learn and practice new skills all the way through high school graduation.

R Reflex Grades 2-6

Solve the math fact fluency problem with Reflex

Reflex makes it easy for students to become math fact fluent and get ready for more complex math. Full of games that students love, Reflex helps all students master their math facts and gain the confidence to keep learning. And because it is fully adaptive, students get the individualized instruction they need to be successful.

F Frax Grades 3-5

Make fractions finally make sense with Frax

Frax uses the latest research-based instructional methods to create a more effective, more engaging way for students to learn fractions. Fun challenges, personalized instruction, and motivating rewards help all students build mastery—all while exploring the galaxy with fractions!

G Gizmos Grades 3-12

Power inquiry and understanding with Gizmos

Gizmos are award-winning, interactive simulations that bring research-proven instructional strategies to life and make learning fun. Students use Gizmos to interact with and explore hundreds of math topics, ranging from fractions to trigonometry.
