# TOOLKIT

Plan • Communicate • Integrate

# Welcome to the ExploreLearning Reflex Teacher Toolkit!

This Toolkit provides support and resources for teachers as they develop their Reflex implementation plan. Overall, your Reflex implementation plan will support the successful integration of the Reflex program into your classroom.

Your careful consideration and documentation of your math fact fluency goals will create a target for your students so that they can work towards the achievement of that goal. Your designed goal achievement recognition strategies for students will support them in their work towards the goals, lead to positive experiences with Reflex and grow a love of mathematics.

The toolkit gives information and practical examples you need to plan for and integrate a proven math fact fluency program into your classrooms.

The ExploreLearning Reflex Teacher Toolkit Contents:

- I. Welcome Letter and Table of Contents
- II. Getting Started - A “Reflex Teacher Toolkit” video describing the use of the toolkit
- III. Reflex Teacher Toolkit videos and resource tools to support you in creating, monitoring, and updating a successful Reflex plan that will result in developing a positive math culture.
  - a. Plan
  - b. Communicate
  - c. Integrate

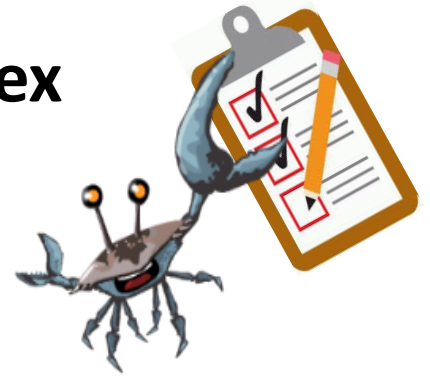

The ExploreLearning Reflex Teacher Toolkit will be updated on an ongoing basis in order to maintain academic relevance. In addition, we welcome your feedback on these pages, and, if you have other good practice examples to share, please get in touch.

**Have a Great School Year!**
